How to Install Propalms TSE 6.5 Service Pack 1 on Windows Server 2008 with UAC enabled

- Step 1** - Got to Start > Right Click on "Command Prompt" > Select "Run as administrator"
- Step 2** - Windows will prompt for permission – Click on "Continue"
- Step 3** - Command Prompt is opened in Administrative context. Now Type following command to run Service Pack installation:-
msiexec /i <path to msi>PROPALMS-TSE65-SP1.msi

- Step 4** - The installation of Service Pack will start. Click "Next" to continue.
- Step 5** - Stop all Propalms TSE Services and then click "Next"; the installation process will continue.
- Step 6** - Click "Finish" to complete the installation.

To verify that the Service Pack is successfully installed on your TSE server you can view it in Control Panel > Programs and Features. You can also check the TSE hotfix status in TSE management console under Manage > Servers.
